

1-)

a-)

```

p => <p lang='en' id='two'>One</p>
i => <image src='Four.jpg' alt='four'></image>
body => <div>image
        p (writed as above)
        i (writed as above)
      </div>

```

b-)

four
one

2-)

v = string
 p = Promise
 q = Promise
 r = Response
 t = string
 x = length

3-)

a-) let f = (a) => return a > 10

b-)

b.filter(f) = [22, 15]

b.map(f) = [false, false, true, false, true]

b.sort() = [5, 8, 10, 15, 22]

c-)

If we make all element in b → string like ['5', '10', '22', '8', '15']

and then sort → b.sort()

Result array will be = ['10', '15', '22', '5', '8']

↑ This result corrects its behaviour
